Start Treating Patients Online The Right Way

Unlock a new revenue stream with
your very own private eCommerce
prescribing clinic. Built for speed,
compliance, and scale.

The Problem

We've helped 1000's of pharmacies evolve their digital presence. But one recurring problem stood out: the disconnect between clinical services, private prescribing, and modern eCommerce.

SOLUTIONS

The Solution

That's why we built The WooPW - a secure, customisable, GPhC-compliant platform that lets pharmacies and prescribers sell POM's online, issue digital Rx's, and deliver outstanding care - all in one place.

Pharmacist-led

Whether you're a prescribing pharmacist looking to grow revenue, or a pharmacy seeking a compliant, modern digital interface, this system has been built with you at the forefront.

Benefits Overview:

Why It Matters

For Patients:

- Access private healthcare online, securely and quickly
- Complete online consultations anytime
- Prescriptions delivered to their door or collected in-store
- Transparent pricing and product/condition access
- Email notifications and re-order reminders
- Personal medical dashboard
- Benefits from highly-popular WooCommerce ordering & purchasing

For Pharmacies:

- Create a new revenue stream through online prescribing
- Fully branded website, hosted on your domain
- Bespoke branding & design available
- Automated private prescription processing and payment
- Drive online/in-store sales
- Boost clinic visibility
- Generate a user database of 1000's of patients. It's our data

For Prescribers:

- Secure, auditable prescribing dashboard
- Digital consultation review and prescription issuing
- Save time with pre-populated treatment pathways
- Advanced Digital Signature System (ADSS)
- GDPR and GPhC-compliant infrastructure
- Really easy user interface

Bespoke	£35k – £100k+	Custom	- Custom build - UX research & discovery - Custom design & dev - Custom functionality and integrations	High-growth clinics or groups with complex workflows and custom functionality requirements

FAQs

growth@pharmacymentor.com

[+44 114 697 0114](tel:+441146970114)

? Are the sites GPhC compliant?

Yes — the system is designed to meet GPhC guidance for online prescribing, ensuring transparency, patient safety, and traceability.

? Who owns the patient data?

You do. All data is securely stored under your organisation's governance and GDPR guidelines.

? Is training included?

Yes, we provide a full onboarding session, video tutorials, and we can come to the pharmacy, depending on availability at the time.

? How quickly can we go live?

Productised sites usually go live within an 8 week period. Semi bespoke towards a 12 to 14 week period. And fully bespoke will need a 16 week minimum turn around (and can be longer)

? Do you provide medicine images?

You will have access to our POM and P-line database, all built in Extras not in our DB are £10 + VAT each, and these must be added manually.

? Can I add new features and functionality to the site?

Yes, the website is fully flexible. Additional features can be developed at extra cost, depending on what's required. Any requests outside the core build will be scoped and priced separately.

? How long am I contracted in for?

There's a 12-month minimum term. After that, you can leave anytime with 30 days' notice — though we aim to be your long-term partner.

? Can I make website changes?

Yes — you can add unlimited products, RAs, pages, blog posts, and content. For design changes, just get in touch with the Pharmacy Mentor team.

? What about risk assessments?

We've built some templates for you to get started ASAP, using AI. But it's up to you to make sure you're happy with them.

Real Clinics. Real Growth

Pharmacies across the UK are **transforming their businesses** through our eCommerce systems. From side revenue to primary income streams, we now have a growing number of clients generating **£100,000s in monthly revenue** using our systems.

Whether it's weight loss treatments, men's health, or skin clinics, our platform is enabling pharmacies to **scale fast, safely, and sustainably**.
